

SAMUEL FIELDS supports the commonwealth of Pennsylvania in the Office of Administration as an enterprise architect and application developer. He is responsible for supporting enterprise service-oriented applications, and serves as lead application architect for the Pennsylvania Recovery Act reporting efforts. He developed the framework for the www.recovery.pa.gov website to help provide Recovery Act transparency at the state government level.

Samuel has worked in the information technology field for over ten years, developing enterprise systems for small- and large-scale organizations. He has planned and executed distributed development projects for various state agencies including PBPP, PHEAA, PEMA, DGS, PENNVEST and the PHMC, focusing on all aspects of the software development life cycle.

Samuel resides in Cumberland County with his wife and three children.
