

SCOTT ROSENFELDER is a director in Deloitte & Touche's AERS national technology and knowledge management practice. Scott has spent the last two years focusing on XBRL technology implementations in the area of financial reporting, general ledger and opportunities in governance risk and compliance. Scott is one of the firm's subject matter experts in this area and leads Deloitte's XBRL vendor alliance program. Through this program Scott and his team work closely with XBRL leading technology vendors. Scott has supported a wide array of clients where he provided businesses with extensive leadership in software development, package implementations and process improvement utilizing technological to improve business performance and customer satisfaction. Scott specializes in strategic technology planning, application design, process flow documentation, project management and business re-engineering. His area of expertise places emphasis on helping service-related and manufacturing industries prepare to compete by defining and implementing the most cost effective technology to increase their overall effectiveness around compliance, internal audit and enterprise risk services. Scott offers more than 18 years of information technology expertise with both public and private sector organizations. Scott was the managing partner of an information technology consulting group prior to merging his practice with Deloitte.
